

APR 10 1974

MEMORANDUM TO: HEADS OF DEPARTMENTS AND AGENCIES

Subject: Modifications to FMC 74-1 - Energy Conservation

On April 5, 1974, the Administrator of the Federal Energy Office sent you a memorandum notifying you of modifications in FMC 74-1 as a result of the lifting of the Arab oil embargo. These new provisions are effective immediately and GSA is in the process of revising the issuances. Federal Management Circular 74-1 is being revised to reflect these changes and those announced in Supplement 1, dated March 12, 1974, as well as agency comments on the corresponding Federal Regulations.

So as not to delay implementation of the new measures during the revision of the circular, GSA will be issuing revisions to Federal Property Management Regulation FPMR D-44 to reflect the change in cooling season temperatures to 78-80°. Similarly FPMR G-15 and FPMR G-16 will be changed from a 20 percent mileage reduction to a 15 percent reduction effective April 1, 1974. I expect these revisions to be published in the Federal Register no later than April 12, 1974.

The changes to the Employee Parking Policy Regulation FPMR D-43 will take somewhat longer since we want to insure incorporation of agency comments. In the meantime, Mr. Simon's memorandum will serve as general guidance for your planning.

We anticipate the Federal Management Circular FMC 74-1 and Employee Parking Regulation FPMR D-43 will be revised and published by April 19.

Should your office have any questions regarding these changes and the issuances, please have them contact Lance Swann, telephone 343-7221.
